

THE AI CARE AGENT FOR DIABETES

Diabetes found is not followed.

Screening finds the people. Laterpath keeps them.

THE PROBLEM

The serious outcomes start with something small.

A retest overdue. A result unread. A foot problem not yet mentioned. Blindness, kidney failure and amputation build from there, over years.

589M

adults live with diabetes worldwide

252M

do not yet know they have it

Source: IDF Diabetes Atlas, 11th edition, 2025.

HOW IT WORKS

Laterpath does the chasing. Your clinicians decide.

Every night, for every person in the program:

1 **Review**
Latest readings, lab results, stage and foot records.

2 **Decide**
What each person needs now, by the program's own rules.

3 **Act**
Does the routine work and prepares what needs approval.

4 **Follow up**
Checks it worked; smaller steps, never louder ones.

5 **Report**
What changed, who needs a human, what it did and why.

WHO DECIDES

The AI has limits, and they are built in.

Autonomous

The AI, within frequency caps and quiet hours: reminders, test-due notices and next steps.

Needs approval

A named person, with one click: escalations, referrals with consent, doctor's letters.

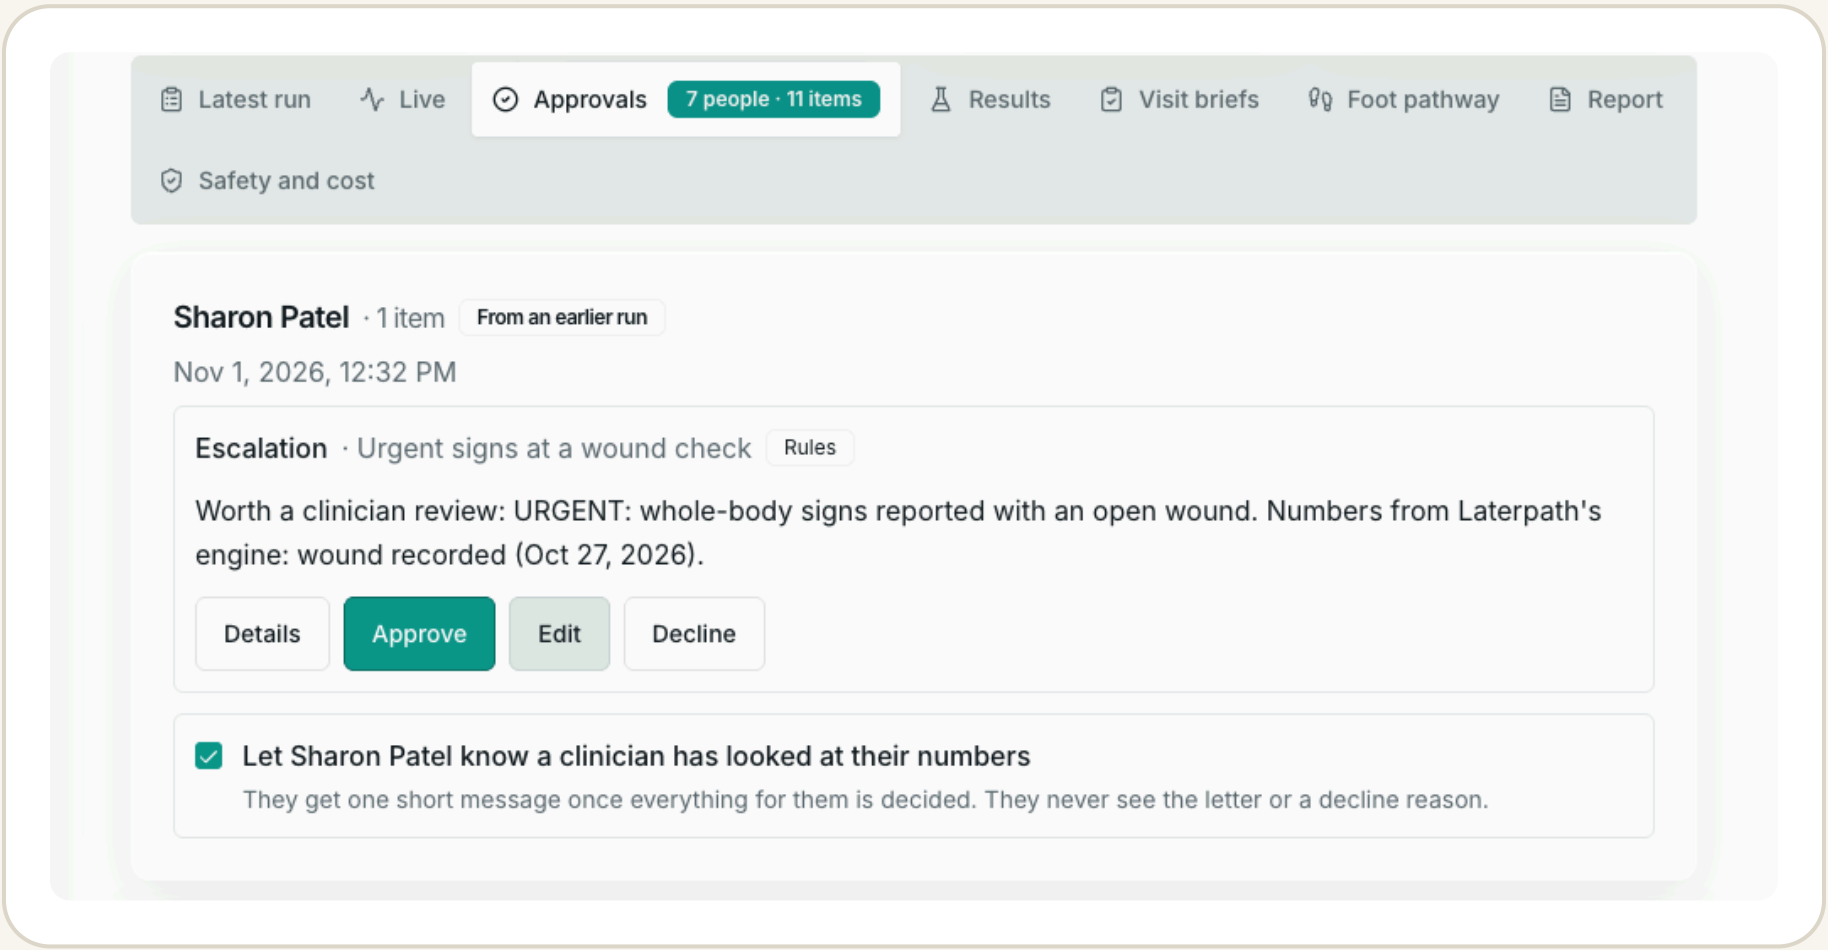

Never

Blocked and logged: prescribing, changing or recommending a medicine, or making a diagnosis.

INSIDE THE PRODUCT

One click for the clinician.

The Care Agent prepares each escalation, with the reason and the reading behind it. A named clinician approves, edits or declines.

Demonstration data: made-up people, not real patients.

COST AND PILOT

Under 3 cents

US, per person, per nightly review*

A 90-day supervised pilot, with measures agreed in advance

Weeks 1–2

Set up

Your rules, caps and brand. Named clinicians on the approval queue.

Weeks 3–12

Run, supervised

Nightly reviews. The pause switch and spending cap stay in your hands.

Day 90

Measure and decide

Gaps closed, results seen, referrals completed, cost per person.

*Measured AI cost on Laterpath demonstration data: US$2.06 for 280 people. Excludes hosting and clinician time.

TALK TO US

“Today’s technology can finally carry the heavy lifting, so clinicians can give their time where only they can.”

Simon Lee, Founder & President

Tell us about the population you look after, and we will come back with a pilot outline, measures and a timeline.

laterpath.com

The Care Agent runs today on a demonstration population of made-up people. Its effect on outcomes will come from a supervised pilot, and we will publish what we find. Laterpath is not a medical device, is not a diagnosis and never replaces a doctor.
